README.MD:

1) You should insert the Squad_7.sql file into the Mysql Server. In your MySQL server, accessed in the same directory containing the changed.sql file

   Command: '**source Squad_7.sql**';

2) Please make sure that the testing PC has a Mysql server running on **PORT 3306.** But you can change the code according to your system requirements inline **502.**

3) **You must change the password and username inline 491. According to your MySQL server username and password**

4) The Zip file has a **main.py** file. Running this file in a python environment asks for a username and password.
   Command: python3 main.py ;

5) Please enter the **username and password for the Mysql server.** If there is no specific Username use '**root**'.

6) If everything went good, you will see "**AGENCY MANAGEMENT SYSTEM**"

7) This CLI is super intuitive. An action can be triggered by pressing the corresponding number. The action-number mapping can be seen in the Interface.
